

TailBlade- Soporcel PM2

TailBlade Units for Double Felted Dryer Section

SOPORCEL PM2, FINE paper 60 –120 g/m², VOITH paper machine, machine speed 1500 m/min, wire width 9350 mm.

Delivery: Four (4) conventional tail threading units where replaced with Runtech Systems new TailBlade units in January 2007.

Results: Improved tail threading at the double felted area. The average wet end break time has reduced by 20% compared to the 2006 average. The customer has now decided to change the whole of the after dryer section to Runtech TailBlades. This second installation will be commissioned in July 2007.

TailBlade Units for Double Felted Dryer Section

Comments from Mr. Paulo Santos – PM2 Superintendent

. "It really improved our threading time at the After Dryer Section!"

. "Very easy and reliable operation! Once tuned it works!"
